# FEATURES

## High-intensity ceramic plaque radiant heater, M

Venturi-effect premixing: The atmospheric burner uses the Venturi effect for quiet, reliable operation and reduced maintenance without mechanical fans.

Robust industrial construction: High-quality stainless steel combustion chamber and durable ceramic emitter plates ensure a long service life in demanding environments.

High-Grid technology: The secondary stainless-steel radiant mesh maximizes the effective radiant surface area.

Optimized radiant distribution: The specially designed reflector provides a wide, uniform heat footprint for consistent comfort in large industrial buildings.

**POWERFUL**
**EFFICIENT**
**TARGETED**

The M series is a high-intensity luminous heater designed for standard industrial and commercial environments. Its fan-free atmospheric burner with Venturi air-induction mixing ensures stable premixing for reliable horizontal installation and quiet operation. Certified to EN 419.

**ANEMOI**

Avenida Balboa, Calle 27 Este
