FEATURES

MagnoHeat mWave, medium-wave electric infrared heater

IP65 weatherproof: reinforced, fully sealed housing designed to withstand rain, dust and extreme outdoor conditions.

Smart and Pro control: flexible multi-zone control via app/Wi-Fi (Tuya/Alexa/Google), plus direct Pro connection for BMS and wall controls.

Over 90% radiant efficiency: transfers over 90% of heat by radiation across the electric range, maximizing efficiency in premium homes and commercial premises.

Carbon Sock technology: the braided carbon-fiber element runs cooler and with less glare than traditional spiral elements, delivering gentle heat without intense light or hot spots.

RELIABLE RADIANT EFFICIENT

MagnoHeat mWave combines modern aesthetics with industry-leading radiant efficiency. Made in North America, this elegant IP65-rated heater is ideal for restaurants, rooftop terraces and premium homes where design and reliability matter.
